DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 32, 33 and 35-43 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 6,642,289. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to add the antioxidant of claim 8 of the patent to the article of claim 12 of the patent in order to improve the stability of the shaped article which can be a motor vehicle part according to claim 14.

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Art Unit: 1714

4. Claims 32, 33, 35 and 38-43 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Du Pont de Nemours JP-6-179908, with Shinohara et al. 5,866,671 serving s its English translation.

5. The reference has been discussed already. Motor vehicle part is the intended use and as such it has no patentable significance. There is no structure or any other property claimed which would distinguish the claimed motor vehicle part from any other molded article. Applicants' claims are not novel. In the alternative, since claim 1 of the reference explicitly claims low formaldehyde concentration levels, which is the aim of applicants' invention, it would have been obvious to one having ordinary skill in the art, at the time the invention was made, to use the moldable compositions of Shinohara et al., for molding other articles requiring the same low formaldehyde levels, i. E. motor vehicle parts.

Claim Objections

6. Claim 38 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The glyoxyldiureide concentration of the claim exceeds the limits of the claim it depends from.
